NP5 Prisma Update Program

A Special Offer - For Owners of PRE60, NP30, I32 MM30, and PRE32 MM30

As our development team worked to finalize the new Prisma application and related technologies it became clear that simply updating the existing APP and AIR control applications would be neither successful nor acceptable. As a result, they developed the **NP5 Prisma**, what we believe is the best solution for incorporating the latest stored and streamed digital media playback features for owners of any of our past products incorporating a digital input.

We particularly wanted to provide our existing streaming customers, some who have been using our initial technology launched eight years ago, with an unprecedented update, one with all the amazing features our current Prisma platform can provide, so we have developed the NP5 Prisma update program.

The NP5 Prisma Update Program offers owners of **PRE60, NP30, I32 MM30, and PRE32 MM30** models an **NP5 Prisma** at 50% off of the suggested retail price with presentation of original invoice and/or verifiable serial number.

- Update Program MSRP: 250 € / 300 US\$
- Prisma Suggested MSRP: 500 € / 600 US\$

NP5 Prisma features shortlist:

- AirPlay 2*
- Bluetooth
- Roon Ready*
- Spotify Connect
- Chromecast built-in
 - Over 160 streaming services available, including Amazon HD, Deezer, Qobuz, TIDAL HiFi, and Roon
 - Simplified network connection using Google Home app
 - Voice control through Google Home devices and Google Assistant
- Multi-room/multi-zone connection and control through a variety of platforms: AirPlay 2, Spotify Connect, Chromecast built-in, and Prisma.
- Wired (LAN) and Wireless (WLAN) connection
- USB A input
- RCA and Toslink outputs with choice of 48, 96, 192 output for connection with any digital to analog converter
- Prisma application for setup of operating features and control of network connected hard drives for high resolution file playback up 24/192 PCM and DSD128
- RS232 control connection with included RS232 cable allowing for Prisma APP control on past Primare models: volume control; mute; power on/off; input selection.

*It is anticipated that NP5 Prisma will launch with AirPlay 2, but if not will come in a future update, with Roon Ready capability soon afterward in a subsequent update.
